

Global Superstore — Shipping and Delivery Policy

Ship Modes

Global Superstore offers four shipping modes, each with different cost and delivery-time implications:

- **Same Day:** Delivered within 24 hours of order confirmation. Available only in metro regions within the US and EU markets. Highest Shipping Cost tier.
- **First Class:** 1–2 business days. Available in all markets except Africa, where regional logistics limit First Class to capital-city hubs only.
- **Second Class:** 3–4 business days. Default recommended mode for Corporate bulk orders.
- **Standard Class:** 5–7 business days. Lowest Shipping Cost tier; default mode when no preference is specified at checkout.

Order Priority and Fulfillment

Every order carries an Order Priority flag — Critical, High, Medium, or Low — which determines warehouse

fulfillment sequencing, independent of the Ship Mode selected:

- **Critical:** Picked and packed within 2 hours of order confirmation, regardless of Ship Mode.
- **High:** Fulfilled same business day.
- **Medium:** Fulfilled within 1 business day.
- **Low:** Fulfilled within 2 business days; typically used for backordered or made-to-order Furniture items.

Shipping Cost Calculation

Shipping Cost is calculated based on: (1) Ship Mode selected, (2) product weight/category (Furniture incurs the highest per-unit shipping cost), and (3) destination Region and Market. Corporate and Home Office segment orders above a \$500 Sales threshold qualify for a flat shipping cost cap, applied automatically at checkout.

Market-Specific Delivery Notes

- **United States and Canada:** All four ship modes available nationwide.
- **LATAM and APAC:** Same Day shipping is not available. Standard and Second Class are the most

commonly used modes due to cross-border customs processing.

- **EU and EMEA:** First Class delivery may be delayed by 1–2 additional business days when crossing customs zones within the region.
- **Africa:** Standard Class only in non-capital regions; First Class available in capital cities.

Delayed or Lost Shipments

If a shipment exceeds its Ship Mode delivery window by more than 3 business days, customers are eligible for either (a) a partial shipping cost refund, or (b) free upgrade to the next-fastest Ship Mode on their next order. Lost shipments (no delivery confirmation after 14 days for Standard Class, or 7 days for expedited modes) are eligible for full replacement or refund.

Multi-Item Orders

When a single Order ID contains multiple Product IDs across different categories, the order ships as separate shipments if items originate from different regional warehouses. Each shipment is tracked independently under the same Order ID.
