

Global Superstore – Customer Segment Service Policy

Segments Overview

Global Superstore serves three customer segments, each with distinct service level expectations:

Consumer, Corporate, and Home Office.

Consumer Segment

- Standard support channel: email and chat, response within 24 hours.
- Standard return, shipping, and discount rules apply with no modifications.
- Loyalty perk: customers with 5+ prior orders (by Customer ID) receive complimentary Second Class shipping upgrades on orders above \$75 in Sales.

Corporate Segment

- Dedicated account manager assigned once cumulative Sales for a Customer ID exceeds \$10,000 in a rolling 12-month period.

- Support response SLA: 4 business hours for High or Critical Order Priority orders; 1 business day otherwise.
- Bulk order threshold: 10+ units of a single Product ID qualifies for volume pricing and priority fulfillment queueing.
- Invoicing: Corporate accounts may request net-30 payment terms in place of point-of-sale payment, subject to credit approval.

Home Office Segment

- Support response SLA: 12 business hours for all Order Priority levels.
- Extended return window (45 days) on Technology purchases, reflecting longer home-business evaluation cycles.
- Eligible for the same volume pricing as Corporate only when order size exceeds 15 units of a single Product ID (higher threshold than Corporate).

Escalation Path by Segment

- **Consumer:** Tier 1 support → Tier 2 specialist (if unresolved after first response) → Regional Customer Experience Lead.
- **Corporate:** Dedicated account manager → Regional Sales Director → Business Operations

team for pricing or contract disputes.

- **Home Office:** Tier 1 support → Regional Customer Experience Lead (Corporate escalation tier not applicable).

Cross-Segment Notes

Segment classification is fixed at account creation and tied to the Customer ID; it does not change automatically based on order volume, though Corporate account-manager assignment is triggered by the Sales threshold above. Segment reclassification requests must go through the Business Operations team.
